

PLUMBING PLAN REVIEW

- Review permit application to find out; project size and occupancy use.
- Read project notes to find out the scope of work.
- Review Architectural floor plan to find out if there are any Fire rated walls.
- Go to the Plumbing plans and read the descriptive notes from the designer to see if they are within the City of El Paso Municipal Code and its Amendments, and the set for plumbing installations is complete.
- If equipment is new look for the plumbing schedules data.
- Check for gas and condensate lines, and the final point of discharge of the condensate drain.
- If there were any Fire rated walls, mark them on the plan to see if any pipes penetrates them and find out if they have the proper fire protection.
- Depending on Occupancy use, look for the occupancy load, and verify that the number of plumbing fixtures meets the City of El Paso Municipal Code.
- See if the plumbing fixtures installation details are supplied and verify that they meet the City of El Paso Municipal Code and its Amendments.
- If all these are met the set of plans is approved, otherwise it will be rejected and notes will be inserted in the comment box.
